

## ***Installation of Oracle8i on Windows XP***

This is a work around to Install Oracle 8i on Windows XP:

- 1 - Copy the content of your Oracle CD into hard disk in your machine. For example Copy from oracle8i CD into D:\Oracle\ ...
- 2 - Search the file Sycmcjit.dll on the D drive (where you have copied Oracle8i. You can found it in:
  - For Oracle8i 1.7:  
D:\Oracle\stage\Components\oracle.swd.jre\1.1.7.30\1  
\DataFiles\Expanded\jre\win32\bin\sycmcjit.dll
  - For Oracle8i 1.6:  
D:\Oracle\stage\Components\oracle.swd.jre\1.1.7.24\1  
\DataFiles\Expanded\jre\win32\bin\sycmcjit.dll
- 3 - Rename this file (Example): sycmcjit\_back.dll
- 4 - Execute the Oracle setup.exe from D:\Oracle\setup.exe
